BARRIER MODIFICATION FOR ELECTROLIER

See Note 4

ELECTROLIER NOTES:
1. See Project Plans for electrolier and pull box locations.
3. This barrier is designed to accommodate only two 1 1/2" electrical conduit for electroliers on the structure. Any transporting of larger conduit is restricted to within the structure.
4. Only the additional reinforcing for the electrolier pedestal is shown. For other typical reinforcing for Type 80 Barrier, see Standard Plan B11-60.
