NOTES:
1. Structure at top of riser may be any standard drainage inlet or pipe inlet.
2. Diameter of slip joint to be 3" greater than diameter of riser.
3. Plastic pipe riser may be substituted for CSP riser shown. Slip joint diameter to be as necessary to accommodate plastic pipe outside diameter.
4. For plastic pipe cross drain, use fabricated reducing tee or same material as cross drain as appropriate to provide watertight connection.
5. Use epoxy resin adhesive conforming to Standard Specification 95-2.03 for bonding slip joint pipe to cross drain.
