NOTES:

1. See Revised Standard Plan RSP A77N6 for additional vegetation control details.

2. Where the distance between back of post and hinge point is less than 42", construct vegetation control to 6" from hinge point unless otherwise specified in this plan. Construct vegetation control where necessary to maintain the 8" block-out at back of post. Where dike is constructed under railing, construct vegetation control flush with the back edge of post.

3. Where dike is constructed under railing, construct vegetation control to back edge of dike. Where paved shoulder is constructed within 36" in front of the post, construct vegetation control to the edge of paved shoulder.
