1. End vegetation control at end of backside rail element.

2. Where the distance between back of post and hinge point is less than 42", construct vegetation control to 6" from hinge point while maintaining the 8" block-out at back of post. If the 8" block-out at back of post is not maintained, construct vegetation control flush with the back edge of post.

3. Where dike is constructed under railing, construct vegetation control 12" in front of dike, where paved shoulder is constructed within 36" in front of post, construct vegetation control to the edge of paved shoulder.

4. End vegetation control at end of backside rail element.
