NOTES:
1. See Revised Standard Plan RSP A77N5 for additional vegetation control details.
2. Where the distance between back of post and hinge point is less than 42", construct vegetation control to 6" from hinge point while maintaining the 8" block-out at back of post. If the 8" block-out at back of post cannot be maintained, construct vegetation control flush with the back edge of post.
3. Where pipe is constructed under railing, construct vegetation control to back edge of pipe. Where paved shoulder is constructed under railing, construct vegetation control to the edge of paved shoulder.
