NOTES:

1. Where the distance between back of post and hinge point is less than 48", construct vegetation control to 6" from hinge point while maintaining the 3" block-out of both posts. If the 3" block-out on back of post can not be maintained, construct vegetation control flush with the back edge of post.

2. Where dike is constructed under barrier, construct vegetation control to back edge of dike. Where paved shoulder is constructed within 30" in front of post, construct vegetation control to the edge of paved shoulder.

3. For wood and steel post sizes, see Revised Standard Plan RSP A77N2.

4. For details not shown, see Standard Plan A78B and Revised Standard Plan RSP A78A.
