Sidewalk, ramp and passageway thickness, "T", shall be 3" minimum.

1. For details of detectable warning surfaces, see Revised Standard Plan RSP A88A.

2. Where an island passageway length is greater than or equal to 6'-0", but less than 8'-0", each detectable warning surface shall extend the full width and 2'-0" depth of the passageway length. Where an island passageway length is greater than or equal to 8'-0", each detectable warning surface shall extend the full width and 3'-0" depth of the passageway length. A 4'-0" wide detectable warning surface may be used on a 4'-2" wide island passageway.

3. Utility pull boxes, manholes, vaults and all other utility facilities within the boundaries of the curb ramp will be relocated or adjusted to grade by the owner prior to, or in conjunction with, curb ramp construction. Detectable warning surface may have to be cut to allow removal of utility covers while maintaining full detectable warning width and depth.

4. The adjacent surfaces at transitions of curb ramps to walks, gutters, and streets shall be at the same level.

5. For additional curb ramp details, see Revised Standard Plan RSP A88A.
