NOTES:
1. H must be a minimum of 2½" or otherwise shown on the plans.
2. For Slotted Plastic Pipe Drain Details, see Revised Standard Plans RSP D98D.
3. For Slotted Corrugated Steel Pipe Drain Details, see Standard Plans D98A and D98B.
5. Minimum grate slot extension length is 80".
6. The top corners of the grate slot extension’s bearing bars must not vary from a straight line more than ½" in 20'-0".
7. Cross bar spacers must be welded to the grate slot extension’s bearing bars to achieve a minimum tensile strength of 12,000 LB normal to the longitudinal axis of the bearing bars.
