NOTES:

1. See Project Plans for spall repair locations.
2. Combine spall repair areas closer than 2' apart.
3. If the spall repair area is less than 6' from a joint, extend the repair to the joint.
4. Cut at least 2" beyond the rectangular limits of unsound concrete determined by the Engineer.

Determine the saw cut depth using the following tables:

<table>
<thead>
<tr>
<th>CONC MATERIAL</th>
<th>SAW CUT DEPTH</th>
</tr>
</thead>
<tbody>
<tr>
<td>FAST-SETTING</td>
<td>2&quot; or 3/4&quot;</td>
</tr>
<tr>
<td>POLYESTER</td>
<td>1/4&quot; or 3/8&quot;</td>
</tr>
</tbody>
</table>
