1. Roadway embankment is not delineated on excavation drawings for clarity.

2. Embankment, if any, must be in place before structure excavation is made.

3. If no roadway or ditch excavation or embankment is involved at the wall, structure excavation will be measured from the original ground.

4. No deduction for crib wall member volumes is made from structure backfill quantities.

5. When an embankment settlement period is required, the upper limits of structure excavation are raised to conform to the elevation of the embankment after the settlement period or, when an embankment surcharge is used to the finished surface and grading plane elevations.

6. Embankment slopes to be as steep as material permits. Slope assumed to be 1:1 for purposes of quantity calculations.
