CONCRETE BARRIER TYPE 60M DELINEATION

Details similar to Type 60M except as noted.

CONCRETE BARRIER TYPE 60MA

Details similar to Type 60M except as noted.

CONCRETE BARRIER TYPE 60MC

Details similar to Type 60M except as noted. Use concrete barrier and anchor when necessary. 36" roadbed surfaces offset shown.

CONCRETE BARRIER TYPE 60MD

Details similar to Type 60M except as noted.

NOTES:
1. See Revised Standard Plan RSP A76A for details of Concrete Barrier Type 60M and anchors. Connection to structures and transitions to Concrete Barrier Type 50 and Concrete Barrier Type 60C.
2. See Revised Standard Plan RSP A76C for Concrete Barrier Type 60M transitions at bridge column and sign pedestals.
3. Where noise screen is required on Concrete Barrier Type 60M, use Concrete Barrier Type 60MC.
4. Where roadbed offset is greater than 1½", see Concrete Barrier Type 60MC.
5. Refer to Project Plans for barrier delineation locations.
6. Reinforcing stirrup not required for roadbed offsets less than 1½".

1. For roadbed surfaces offset greater than 1½" and less than or equal to 3", no reinforcement required. For roadbed surfaces offset greater than 3" and less than or equal to 8", use two #4 Reinf at 3" above the lower roadbed surface.
2. Where roadbed surfaces offset greater than 8" and less than or equal to 12", use two #4 Reinf at 6½" above the lower roadbed surface and two #4 Reinf at 3" above the lower roadbed surface.
3. Where roadbed surfaces offset greater than 12" and less than or equal to 36", use two #4 Reinf at 3" above the lower roadbed surface and two #4 Reinf at every 6" increment vertical spacing above the first two #4 Reinf.
