NOTES:

1. Line post, blocks and hardware to be used are shown on Revised Standard Plans RSP A77L1, RSP A77L2, RSP A77N1, RSP A77N2 and Standard Plan A77M1.

2. MGS post spacing to be 6'-3" center to center, except as otherwise noted.

3. Except as noted, line posts are 6" x 8" x 6'-0" wood with 6" x 8" x 1'-2" wood blocks, 6'-0" x 8.5" or 6" x 9 steel posts, 6'-0" in length, with 6" x 8" x 1'-2" notched wood blocks or plastic blocks. May be used for 6" x 8" x 6'-0" wood post with 6" x 8" x 1'-2" wood blocks where applicable and when specified.

4. Layout Types 11A through 11L, shown on the A77P Series of Standard Plans, are typically used where MGS is recommended to shield embankment slopes and a crashworthy 31" end treatment is required for both directions of traffic.

5. The type of 31" terminal system end treatment to be used will be shown on the Project Plans.

6. Depending on site conditions (embankement height and side slope), construction of additional MGS (length equal to multiples of 12'-0" with 6'-3" post spacing) may be advisable.

7. Where placement of dike is required with MGS installations, see Standard Plan A77M1 for dike positioning details.

8. Use 4'-0" offset for 8-inch block. For 12-inch block, use 4'-0" offset.
