**NOTES:**

1. Line posts, blocks, and hardware to be used are shown on Revised Standard Plans RSP A77L1, RSP A77L2, RSP A77N1, RSP A77N2, and Standard Plan A77M1.

2. Wood post spacing to be 6'-3" center to center, except as otherwise noted.

3. Except as noted, line posts are 6" x 6" x 6'-0" wood with 6" x 6" x 1'-2" wood blocks. 6" x 8" or 6" x 6" steel or notched recycled plastic blocks may be used if applicable.

4. A 4"-0" minimum clearance is required between the face of the rolling and the face of a fixed object located directly behind the MGS section with wood posts at 6'-4" spacing. 6'-3" spacing is required for reinforced concrete or metal posts with 6" x 8" x 1'-2" wood blocks where applicable and when specified.

5. The type of 31" terminal system to be used will be shown on the Project Plans.

6. The type of 31" terminal system to be used will be shown on the Project Plans.

7. As site conditions dictate, construct additional MGS to shield fixed object(s) in addition to MGS length equal to multiples of 12'-6".

8. Use this offset for 8" block. For 10" block use minimum 4'-0" offset.

10. The 8" or flatter flare for the buried post anchor is based on the edge of the paved shoulder or offset line at the end of the traveled way. The length of MGS within the 8" or flatter flare is based on site conditions and should be a length equal to multiples of 12'-6". When the MGS post spacing to be 6'-3", except as otherwise noted.

11. For details of Buried Post Anchor, see Standard Plan A77T2.
