LEGEND:

1. All approach slab reinforcement shall be epoxy coated and minimum top not cover 2½" in Freeze-Thaw Area.

NOTES:

1. For MR < 2", adjust reinforcement to clear sawcut for seated joints. For MR > 2", reinforcement must be normal to BB or EB and spaced to avoid joint seal assembly anchorage.
2. At the Contractor's option, approach slab transverse reinforcement may be placed parallel to BB or EB. Spacing of transverse reinforcement is measured along BB or EB and spaced to avoid joint seal assembly anchorage.
3. For details not shown, refer to Revised Standard Plan RSP B9-5.
